Bloggy

24th May 2020

OVERVIEW

Bloggy is a simple blog site made mainly with ease of use in mind. People can post short blogs about their day on this platform. It is made mainly with **flask** web framework and **bootstrap.**

GOALS

1. To provide a simple user-friendly platform.
2. To provide a platform for others to share their thoughts.

SPECIFICATIONS

Bloggy is a simple web app made with Flask and Bootstrap with other web technologies. It uses many modules from the flask web framework for its efficient use. A user can make a post and can update or delete it whenever he can in this first beta build.

IMAGES^ : **Folder link**

VIDEO* : **Drive link**

^(Link is to a folder containing the images, if the images was added here one-by-one space issues may occur. So for the ease link is provided)

*(Uploading profile images is working but in the video the file explorer window was not recorded Due to some issue)

FUTURE:

If this project is continued, the following features will be added:

1. UI/UX improvements
2. Social media linking
3. Upvote/Like feature
4. Something to remove spams
